TECHNICAL SKILLS

- HTML
- JavaScript
- MongoDB
- React
- Express.js
- Bootstrap
- CSS
- TypeScript
- Firebase
- Node.js
- Next.js
- GraphQL

LANGUAGE SKILLS

Italian: Native
English: C1
Spanish: B1
German: A2

EDUCATION HISTORY

FULL STACK DEVELOPMENT | CODE ACADEMY

September 2022 - February 2023

intensive and full-time onsite course that lasted 6 months, consisting of 840 hours of practical, project-based work. Throughout the course, we followed the Agile/SCRUM framework as a cohort, incorporating code reviews, spikes, and presentations into our activities.

➤ CODAC

I contributed to a collaborative project to implement the Academy's new community platform using NEXT.js, Typescript, and GraphQL.

➤ BERLIN FANTASTIC CREATURES

Social Network App built with the MERN Stack. The Back-End uses APIs to communicate with the React Front-End, enabling features like posts, comments, likes, and favorites. Web tokens and access management rules (CRUD) have also been implemented for secure data exchange.

➤ AGE OF EMPIRES 2

Progressive Web App using React, integrated with an Age of Empires II API to fetch data from multiple endpoints. Additionally, I leveraged Firebase Authentication and Firestore to implement features such as favoriting and commenting.

➤ GET A RECIPE

This recipe website was created with HTML5, CSS3, Bootstrap, JavaScript, AJAX, APIs, and JSON. Live calls were used to display results, which were manipulated using the Document Object Model.

WORKING EXPERIENCE

7 years of experience working in the gastronomy sector as a chef, including 3 years as a Chef de Partie. During my tenure as Chef de Partie, I led teams of up to 4 people.

SOFT SKILLS

- Confident under pressure
- Detail-oriented
- Team player
